

CTT 60 Clienter Touch Tower

ticket machine and information kiosk

Brief description

The exclusively designed tower is primarily used for customer service, ticketing and information sharing purposes. The standing device is a high-tech product: surface made from stainless steel, with astral silver frame, built-in LCD touchscreen and built-in high quality electronic parts. It is vandal-proof and easy to keep clean.

The Info Touch Tower is optionally expandable with BAR code reader, RFID card reader, stereo speaker, or external speaker is connectable. The device can be connected to Wi-Fi or telephone network.
